

THE ADMINISTRATIVE CODE AMENDMENT

IF THE CODE IS AMENDED

- **Medicare eligible retirees will have inferior options for their health care plans.**
- **We will be not able to avoid health care premiums for in-service or retirees because the benchmark isn't firm or equal.**
- **The advances of 40 decades of collective bargaining will be undone. We will be thrown back to the 1950's when different classes of benefits existed and the City and MLC will choose who gets an inferior plan and who gets a good plan, and who pays for it.**

Retiree Corrected!

IF THE CODE DOES NOT CHANGE

- **The judge ruled the City had to pay for all plans offered under the cap. The judge did not say the City had to offer one plan. Plan eliminations would have to be agreed to by the MLC.**
- **Retirees have a variety of plans all under the cap. But the UFT and MLC are willing to sell off those plans for your raises. Again.**
- **In-Service members will retire someday and become Medicare eligible. Their traditional Medicare benefits which they paid for throughout their years of service will be preserved with no networks, prior authorizations, and most importantly, not privatized.**
